

ROUSH®

Focused. Driven. Committed.

Roush Industries Job Posting August 31, 2010 – September 7, 2010

Senior Manufacturing Engineer

Roush supplies comprehensive, integrated development services and provides customers with support that fuses technology and engineering. From design through prototyping, testing and manufacturing, we take our customers' visions from the sketch pad to production. We're focused, efficient, and we deliver. With over 2000 employees in more than 40 facilities across the United States, and interests around the world, Roush solves customers' problems and provides significant support to the automotive, performance products, military, entertainment, life sciences, alternative fuels and consumer products industries.

We are focused on performance, driven by technology, and committed to our customers' success. If you're only happy when your customers are happy, we want you on our team.

Due to continued success, Roush is undergoing an exciting period of growth across many domains. We have a current opening for a **Senior Manufacturing Engineer** who will initially be responsible for the development of fabricated assembly quote packages. The position is located at our Allen Park, MI facility.

Duties:

- Assist in the identification of proposal opportunities
- Advise on DoD contracts and Federal Acquisition Regulations (FAR)
- Develop price / technical proposals
- Assist program teams in the design of specific fabricated structures. Lead the design and development of weld fixtures and weld maps
- Work with Roush manufacturing and assembly groups to ensure customer procedural and process requirements are met
- Assists with developing sequence of assembly / component build plans and scheduling
- Supervise the development of technical / operations and maintenance manuals as required
- Identify manufacturing investment opportunities to support future programs

Requirements:

- Minimum 10 years' experience in a fabrication environment delivering defense contracts. This experience should include both design engineering and supervisory experience
- Must have an understanding of welded fabricated structures
- Ability to lead the design of weld fixtures and to recommend optimum weld maps to produce assemblies that meet all customer requirements
- Previous experience with proposal development
- Must be customer focused
- Must be detail-oriented self-starter willing to work in a fast paced and dynamic environment
- Ability to work independently and in a team environment

You must refer to this posting to be considered. Send resume by September 7, 2010. **AA/EEO**
