

ROUSH®

Focused. Driven. Committed.

Roush Industries Job Posting August 6, 2010 – September 10, 2010

Program Manager – Vehicle Chassis

Roush supplies comprehensive, integrated development services and provides customers with support that fuses technology and engineering. From design through prototyping, testing and manufacturing, we take our customers' visions from the sketch pad to production. We're focused, efficient, and we deliver. With over 2000 employees in more than 40 facilities across the United States, and interests around the world, Roush solves customers' problems and provides significant support to the automotive, performance products, military, entertainment, life sciences, alternative fuels and consumer products industries.

We are focused on performance, driven by technology, and committed to our customers' success. If you're only happy when your customers are happy, we want you on our team.

Due to continued success, Roush is undergoing an exciting period of growth across many domains. We have a current opening for a **Program Manager – Vehicle Chassis** who will be responsible for planning, organizing, executing, and monitoring all aspects of the assigned programs to achieve internal and external customer commitments for delivery, performance, and financial requirements. The position is located at our Allen Park, MI facility.

Your Role:

- Direct the completion of new programs that achieve budget and schedule requirements.
- Exhibit responsiveness and a proactive approach to communication that will result in excellent customer relations.
- Develop and implement processes that deliver quality and timely products.
- Provide leadership, guidance, coaching, and technical support to team members

Requirements:

- Bachelor's degree in Engineering or Business Administration; with a minimum of five years' management or supervisory experience; or equivalent combination of education and experience.
- Minimum five years' project/program management experience in a Vehicle Chassis environment with emphasis in areas such as frame / structures, suspension, steering, brakes, driveline, or vehicle dynamics.
- Previous automotive industry experience with an OEM and/or supplying to OEM or Tier 1 suppliers.
- Must possess strong leadership/management skills, be self-motivated, and have the ability to project manage and problem solve.
- Must be able to act as liaison with design studio, suppliers and other departments for all design responsible parts
- Must be customer focused.
- Must be cost and schedule focused.
- Excellent computer skills and knowledge of computer software (Windows, Word, Excel, etc.)
- Must be proficient in various OEM data managements systems.
- Excellent written and verbal communication skills.
- Willing to travel up to 25% throughout North America and overseas.
- Must be able handle multiple tasks and work flexible hours.
