Focused. Driven. Committed.

Roush Industries Job Posting August 13, 2010 – September 13, 2010

Estimator – Precision Machined Parts

Roush supplies comprehensive, integrated development services and provides customers with support that fuses technology and engineering. From design through prototyping, testing and manufacturing, we take our customers' visions from the sketch pad to production. We're focused, efficient, and we deliver. With over 2000 employees in more than 40 facilities across the United States, and interests around the world, Roush solves customers' problems and provides significant support to the automotive, performance products, military, entertainment, life sciences, alternative fuels and consumer products industries. We are focused on performance, driven by technology, and committed to our customers' success. If you're only happy when your customers are happy, we want you on our team.

Your Role:

We have an immediate opening for a Precision Machined Parts Estimator who is motivated by variety and change, and who actively enjoys new and unplanned experiences. You must show a capacity to quickly assimilate and understand the implications of new developments and be ready to respond appropriately to situations as they evolve. As an Estimator you will analyze blueprints, specifications, proposals, and other documentation to prepare time and cost estimates of machined parts for the aerospace, military and automotive industries. The position is located in Livonia, Michigan.

Duties:

- Analyze drawings, parts lists, and other data to determine manufacturing requirements.
- Consult with outside suppliers.
- Compile and review request for quotes.
- Prepare cost estimates used by management for purposes such as planning/organizing/scheduling work, preparing bids, and determining cost effectiveness of make/buy analysis.
- Responsible for producing timely, accurate and complete estimates.
- Display awareness of competitive market and cutting-edge manufacturing processes.
- Make recommendations to improve the manufacturing process.
- Track variances between estimated cost and actual cost to effectively evaluate the adequacy and accuracy of the utilized estimating parameters.

Requirements:

- Minimum High School diploma or equivalent; Associate's degree in Engineering or related field is preferred.
- Minimum ten years' recent precision machined parts cost and estimating experience in a low-volume job shop environment.
- Previous experience CNC machining – CNC Milling, CNC Lathe, 3D Milling, and Manual Tool Room Equipment.
- Knowledge of manufacturing and machine processes.
- Must be a self-starter & self-motivated.
- Good computer skills and knowledge of computer software (Windows, Word, Excel, etc.); previous cost estimate software experience is preferred.
- Excellent written and verbal communication skills.
- Must be able to handle multiple tasks
- Must be willing and able to work overtime when necessary.

Benefits include medical, dental, vision, life insurance, LTD, 401K, paid vacation, and paid holidays.

You must refer to this posting to be considered.
