

ROUSH®

DESIGN STUDIO — INTEGRATED DESIGN SERVICES

The Roush Design Studio integrates modern technologies with traditional craftsmanship, turning renderings, package plans and CAD/CAE data into precise physical models. We provide seamless, on-site access to a complete package of product development and manufacturing services — all the tools required to take a program from concept drawing through production release.

The Roush Design Studio provides an extremely secure, efficient environment for niche, concept and prototype vehicle development.

from start to finish

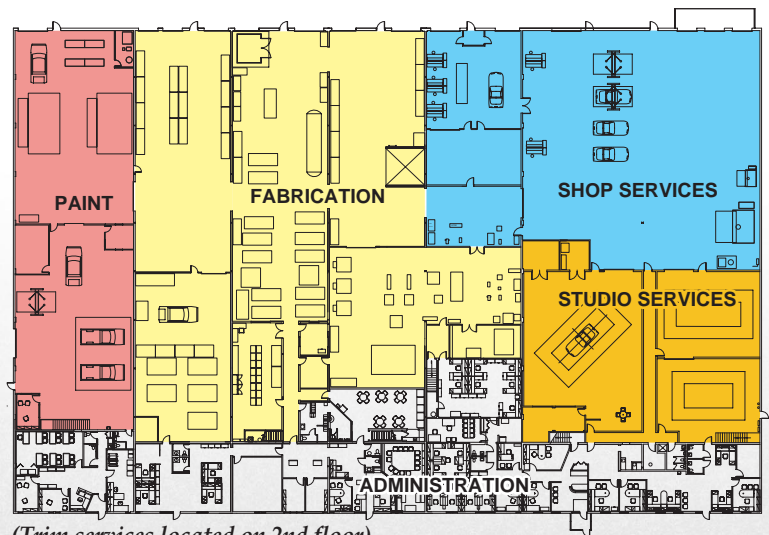

DESIGN DEVELOPMENT

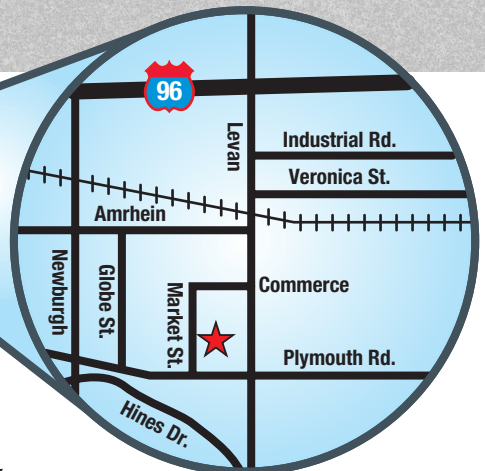

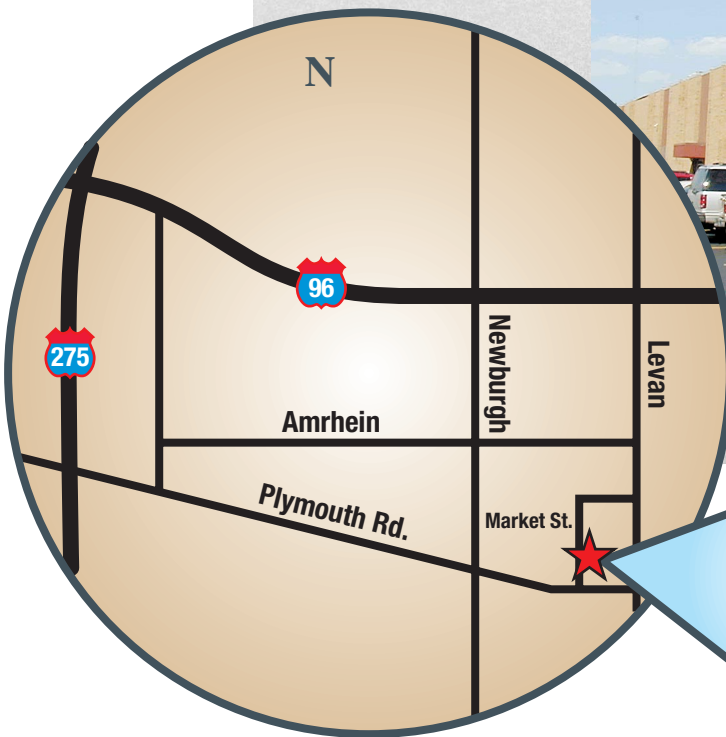

- One 3,500 sq. ft. temperature-controlled dedicated space with 14 ft. ceiling and 32 ft. side-viewing angles to the model
- Two 1,500 sq. ft. temperature-controlled dedicated spaces with 14 ft. ceiling
- Norton Surface Plates (10' x 26') installed flush to the floor
- Lighting:
 - Linear ribbon fluorescent lighting
 - Average 150 Footcandles at floor
 - Color-corrected to 5,000K with a Color Rendering Index (CRI) of 80
 - Variable lighting level controls and zones
- Design management office
- Separate suite for electronic design workstations
- Electronically-controlled security system
- Tarus 5-Axis Mill
- ATOS Digitizing System
- Portable floor model coordinate measuring machine
- Experienced staff of clay modeling and milling professionals available as required
- Office area adjacent to design studio can accommodate up to 30 support personnel

ADDITIONAL ON-SITE SERVICES

- Complete hard-model fabrication
 - REN foam and wood modeling
- Advanced composites
 - Prepreg carbon fiber
 - Epoxy wet lay
 - Vacuum bag
 - Autoclave cure process
- Soft Trim
 - Vehicle interiors
 - Complete vehicle camouflage
- Paint
 - Auto Show quality
 - Powder coat
- Metal fabrication
- Electronics

(Trim services located on 2nd floor)
